EDUCATION

Rangsit University Bachelor of Science in Information and Communication Technology, First Class Honors

- Relevant Coursework: Object-oriented Programming, Data Structures and Algorithms, Full-stack Web Development, Database Management, System Analysis and Design, Data Communications and Networking, Information Assurance and Security, Cloud Computing, Data Warehouse and Data Mining, Games Design and Programming, AI and Intelligent systems, Machine Learning.
- Activities: Peer Mentor at RIC Language Center

EXPERIENCE

Software Engineer

Mar 2026 - Present

Manatal

Full-time | On-site

- Built and maintained full-stack features using Vue.js on the frontend and Django REST Framework on the backend for a large-scale SaaS recruitment platform.
- Developed reusable frontend components and user interfaces within a micro-frontend architecture and shared design system.
- Implemented backend features across API, service, and data layers while ensuring maintainable and scalable application design.
- Wrote and maintained automated tests to improve software quality and reduce regressions.
- Contributed to CI/CD workflows and deployment processes to support efficient software delivery.
- Monitored and resolved application issues across development, staging, and production environments.

Product Engineer

Feb 2026 - Mar 2026

Newl

Freelance | Hybrid

- Built a full-stack AI career simulation platform using React, TypeScript, and Supabase, integrating LLMs to generate personalized future career narratives.
- Designed and implemented a multi-agent orchestration pipeline with web-grounded research, parallel content generation, and output validation to improve response accuracy and consistency.

Full-Stack Developer

Nov 2025 - Jan 2026

Scarlett Panda

Contract | Remote

- Developed and maintained full-stack features using Svelte on the frontend and Python (FastAPI) on the backend for a production web application.
- Built and enhanced storybook-related features, including onboarding user workflows, storybook content generation, and extra content modules.
- Optimized LLM prompt generation logic to improve consistency and quality of AI-generated story content.
- Developed a referral challenge feature, supporting user engagement and growth initiatives.
- Integrated backend services with Supabase for data storage, authentication, and application logic.

Software Developer Intern

Aug 2025 - Dec 2025

Issa Compass

Full-time | On-site

- Built an internal AI-powered workflow automation tool using React, Next.js, and TypeScript to automate the generation and review of responses for customer inquiries.
- Developed a response evaluation interface to compare AI-generated responses with human agent responses for quality analysis and internal review.
- Designed and implemented backend APIs using Golang (Gin) and Python (FastAPI) to automate customer inquiry workflows and improve support efficiency.
- Designed and managed PostgreSQL databases, performing schema design and CRUD operations for conversations, logs, and application data.
- Implemented API integration between frontend and backend services, handling data fetching, state management, and error handling.
- Applied component-based architecture to improve frontend code reusability and maintainability.
- Used Git and GitHub for version control, code reviews, and team collaboration.

AI Master Trainer

May 2025 - Present

ASEAN Youth Organization (AYO)

Part-time | Remote

- Promoted digital inclusion and capacity building by empowering underserved communities with accessible AI literacy and critical thinking skills.
- Conducted workshops and hands-on training sessions using the AI Class ASEAN curriculum, covering foundational AI concepts, practical AI usage, and ethical AI principles to learners of varying ages and backgrounds.

TECHNICAL EXPERTISE

- Languages: Python, TypeScript, JavaScript, Golang, C#, SQL
- Frontend: React.js, Next.js, Vue.js, Tailwind CSS, Framer Motion
- Backend: Node.js, Django, DRF, FastAPI, JWT Auth, Django ORM
- Databases & Infrastructure: PostgreSQL, MySQL, SQLite, Supabase, Redis, Elasticsearch, Docker, AWS (S3, CloudFront), Vercel, Linux
- Testing & DevOps: Jest, Playwright, Cypress, Git, GitHub Actions, CI/CD, ESLint, Prettier
- Monitoring & Tools: Datadog, Sentry, Postman, Jira, Slack
- Architecture & AI: Microservices, Distributed Systems, Event-Driven, Real-Time Platforms, LLM Applications, Agentic Workflows, Prompt Engineering

LANGUAGE

- Burmese - Native
- English - Proficient
- Thai - Basic
